

ARMADILLO

A NEW BREED IN COMPOSITE DECKING

Flashing

From what we've been hearing, this is the product you've been waiting for—a durable plastic flashing made for composite decks. Armadillo Deck has put it to the test and considers it to be the perfect product for extending the life of your deck frame and your deck.

This flashing has everything you could ask for. It's easy to handle, light weight, extremely tough and it lasts longer than most metal flashings on the market. It's a perfect match for Armadillo Deck, making sure that your deck frame holds up as long as your deck boards do.

Plastic flashing is the perfect solution for directing water away from the house and over the ledger board. By preventing that moisture from seeping into the stud wall and rotting the house frames supporting the deck, you'll not only be building a longer lasting deck, you be making the deck safer for the homeowner.

Flashing

EASY TO INSTALL!

Simply place the flashing on top of the ledger board with the log side against the house and attach with nails or staples every 16' to the structure.

Our low maintenance decking is a smart investment. Protect that investment by guarding its foundation. When leaves and debris get trapped between your deck boards and joists, it causes deterioration. Armadillo Deck Joist Covers protect the underlying lumber where moisture collects to prevent rotting. Protect the sub-structure of your deck.

Armadillo Deck - because we care about your whole deck!
