

Want to use a PVC trim product that is protected from lumberyard dust?

Want a PVC trim that doesn't need cleaned before painting?

Want an authentic woodgrain that has tremendous curb appeal?

Want a damage free product that can be easily returned to the lumberyard for credit?

Palight has a protective covering on the smooth and textured side (see sample enclosed).

Palight offers up to a 16" trim for columns and other applications.

Palight has a dense free-foam, uniform cell structure which allows for outstanding workability.

Palight has sealed edges that do not collect dirt.

Palight offers a sand colored trim board as an alternative to classic white.

Palight has unique profiles such as trimboard with window fin, skirt boards, J-channel w/ window fin and J-channel corner board.

Palight has mouldings that include six crown profiles, base cap, brick, bed, scotia cover, quarter round, drip cap, shingle and historical sill.

The Cortex fastening system means no additional caulking, sanding or painting needed on the surface.
