

Industrial Division

Our Industrial Division provides precision cutting, ripping, and custom sizing services for a wide range of lumber & engineered wood products. We specialize in delivering consistent, production-ready components tailored to customer specifications.

Core Capabilities

Precision Trimming & Crosscutting

- Tight tolerances ($\pm 1/32$ " or better)
- Clean, consistent end trims
- Custom length cutting up to 20'+ material
- Angle cuts and specialty crosscuts available

Engineered Wood Processing

- Capable of processing LVL and other engineered products
- Custom sizing and trimming for structural components

Custom Ripping & Resizing

- Rip boards up to 12" wide
- Produce narrow strips and custom-width components
- Split material up to 12" wide
- Shave-down capabilities to achieve precise net dimensions
- Convert standard dimensional lumber into custom finished sizes

Specialty Cuts

- Dado cuts and notching
- Select angled cuts

Material Parameters

- Max board length 20'8"
- Wide material capacity (up to 12")
- Tight kerf cutting for material efficiency
- Ability to produce "net" finished dimensions

What Sets Us Apart

- Consistent dimensional accuracy
- Production-scale capability
- Flexibility for custom and specialty runs
- Ability to convert commodity lumber into ready-to-use components
